2025

Ilbagno is the APE Grupo's proposal for integrated bathroom projects: a range of basins, countertops and bathtubs with a multitude of customization options.

Ilbagno es la propuesta de APE Grupo para proyectos integrales de baño: una gama de bañeras, lavabos y encimeras con multitud de opciones de personalización.

Materiales avanzados con las mejores propiedades técnicas para espacios tan exigentes como el baño. Ilbagno apuesta por diseños combinables con una gran cantidad de colecciones de recubrimientos del catálogo de APE Grupo. De esta manera se pueden mezclar acabados entre los diferentes elementos de un proyecto, dando coherencia al baño con el resto de la vivienda o proyecto público.

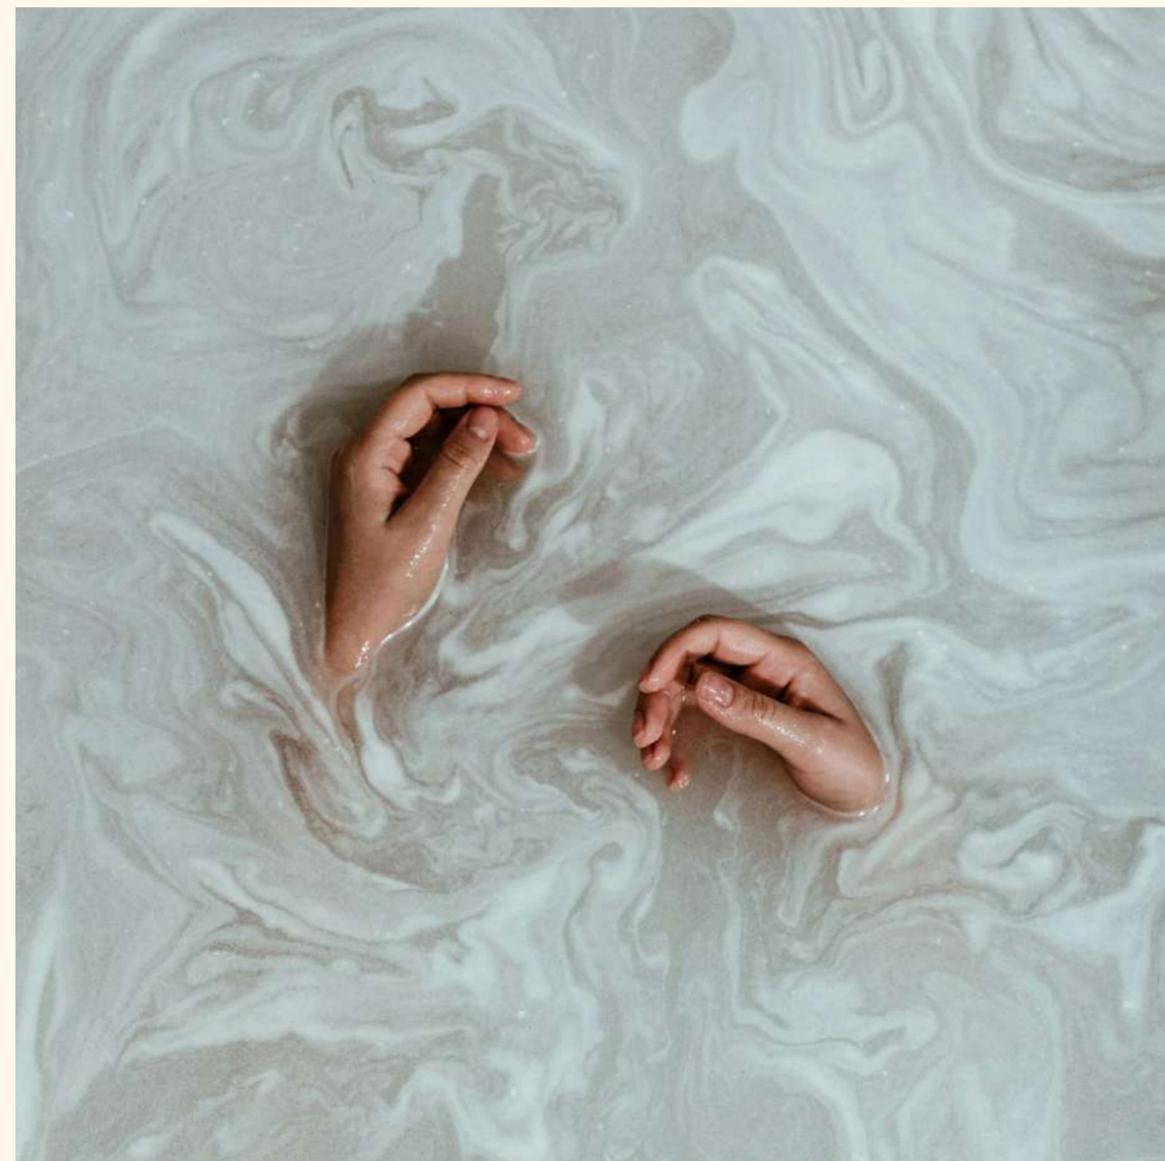

Un abanico de posibilidades matéricas para el baño

A wide range of material possibilities for the bathroom

Advanced materials with the best technical properties for such demanding spaces as the bathroom. Ilbagno is committed to combinable designs with a large number of wall covering collections from the APE Grupo catalog. In this way, finishes can be mixed between the different elements of a project, giving coherence to the bathroom with the rest of the home or public project.

El catálogo de Ilbagno ofrece soluciones completas —lavabos, encimeras y bañeras— en diferentes acabados matéricos para combinar recubrimientos y elementos funcionales, creando proyectos coherentes y con personalidad propia.

The Ilbagno catalog offers complete solutions —sinks, countertops and bathtubs— in different material finishes to combine coverings and functional elements, creating coherent projects with their own personality.

Porcelánico

Porcelánico creado con las últimas tecnologías de fabricación digital. Un material con altas prestaciones técnicas y estéticas, gracias a un diseño propio y único. De esta manera es posible combinar elementos funcionales del baño como lavabos o bañeras con las mismas colecciones de pavimento y revestimiento.

Porcelain

Porcelain created with the latest digital manufacturing technologies. A material with high technical and aesthetic performance, thanks to a unique design. In this way it is possible to combine functional bathroom elements such as sinks or bathtubs with the same floor and wall tile collections.
